IMPORTANT CONSIDERATIONS

GRASS & LEGUMES IN ROTATION

CROPS BMP #7

Photo courtesy of Creative Commons

Description:

The use of grasses and/or legumes for one or more years as part of a crop rotation.

AWQA Minimum Requirements:

Grasses and legumes should be used in the rotation with other crops to prevent erosion.

Recommendations:

The number of years of grasses and/or legumes needed in the crop rotation depends on the other crops grown, soil and landscape conditions, and the other best management practices.

The number of years in a rotation will be a determining factor in the selection of grasses and legumes.

Always consider the farm operation, livestock numbers, and future needs of hay or pasture crops.Consider herbicide carryover to avoid crop failures.
